

I personally would like the NJ DO NOT CALL Program NOT to be weakened by the telemarketing lobby. I only want to talk to people I call for information, NOT by nuisance telemarketers. Just the fact you are even considering this change smacks of under the table dealings, greasy palms behind your backs, and complete and total disregard for a program better than the federal program. Why don't you instead improve the Federal DO NOT CALL program and tell the telemarketing lobby to live with what they've got, not what they want. Kind of like the general public has to live with what they've got.....
